FARM

## Fostering Agriculture Rural Development and Land Management

In this EU-funded project FARM (Fostering Agriculture Rural Development and Land Management), an important factor is the contribution to the improvement of ARD with the introduction and application of current ICT DSS tools in ARD. An extensive review was conducted to collect available DSS tools within Europe. The findings were visualized with an interactive map and dashboard and are shown below.

DSS Hotspots
164

Mapping of the DSS hotspots

Technologies/Study fields covered

Distribution of Technologies:
- Data Science — 42
- Sustainability — 35
- Precision Agriculture — 27
- Internet of things — 21
- Research and Survey — 13
- Service for agriculture — 10
- Robotics — 7
- Supply chain — 4

Various applications addressed by the DSS tools

| Water Management | Soil Management | Economic Aspects | Climate change |
